Student Evaluations of Teaching

Selected Student Comments from Course Evaluations for 2018

Socl 5351: "Great course/Great professor"
His ability to make sure we learn the material.
The professor always gave great feedback. He always encouraged student participation and he cares about student needs. He also provides additional reading material and resources.
It was loaded with information, and professor always added extra information within his comment about our course work.

Dr. Johnson's feedback goes beyond saying a piece of work is good or poor to include specific highlights and more in-depth information to continue learning. He encourages engagement in the weekly discussions and digging deeper into subject matter by interacting with students in the discussion forums and by posting additional articles through email.
Johnson Christopher SOCI5355 251 Dr J is very knowledgeable and is always willing to help the students. He responds to each student and to each post and adds to the information presented in the material. Have an assistant/student/intern who will go thru the modules each week to confirm that the links are working and that the material is available. (Each week and not at the first of the semester.) Links change often and it is time consuming and frustrating to try to hunt them down. If there is a broken link, the intern can find and load the document to email or contact TRACS for assistance. Thanks for asking this question.

Johnson Christopher SOCI5388I 251 The professional spot on even though the program was online you kind of have the feeling as if its face to face because of the professor's interactive style which impresses me and am grateful for.

I think the professor in future should organize meet and greet for meet with us and socialize so that we students can network with each other
Johnson Christopher SOCI5388I 251 Dr. Johnson provided valuable feedback! He also provided guidance on where to look for more info pertaining to the subject. He is very understanding and concerning with his students.

I wish Dr. J. taught ALL dementia and aging classes. I loved him so much and will definitely miss his classes! It is a shame that I am dropping this semester due to lack of help from Dr Mileski who is a professor that students HAVE to take courses with. I will be transferring to UNT to finish my degree, But if I could take all Dr J classes I would me in a better predicament and would most certainly stay a student of Tx State University. Thanks Dr. C. Johnson!

This course as well as his other courses are well taught. Thanks Dr. J!

SOCI5388I 251 Professor truly tried to make sure we understood the material.

Johnson Christopher SOCI5388I 251 Dr. Johnson is always involved with the classes that he teaches, and it is obvious that he is very knowledgeable about the subjects of aging and dementia.

Johnson Christopher SOCI5388I 251 Feedback from the professor on all of the class requirements. It was detailed and in depth.
